

CHILD CARE GUIDELINES

APPENDIX 2

PLAN ISOLATION STEPS IF A CHILD OR STAFF MEMBER BECOMES SICK FOLLOWED BY CLEANING AND DISINFECTING PROCESSES.

- Have an isolation room or area (such as a cot in a corner of the classroom) that can be used to isolate a sick child.
- Follow CDC guidance on how to disinfect your building if someone is sick.
- If a sick child has been isolated in your facility, clean and disinfect surfaces in your isolation room or area after the sick child has gone home.
- If COVID-19 is confirmed in a child or staff member:
 - » Close off areas used by the person who is sick.
 - » Open outside doors and windows to increase air circulation in the areas.
 - » Wait up to 24 hours, or as long as possible, before you clean or disinfect to allow respiratory droplets to settle before cleaning and disinfecting.
 - » Clean and disinfect all areas used by the person who is sick, such as offices, bathrooms and common areas.
 - » If more than 7 days have passed since the person who is sick visited or used the facility, additional cleaning and disinfection is not necessary. Simply continue routine cleaning and disinfecting.
